Elecnor Group at a glance

Key financial figures

Main investments in Infrastructures and Renewables

Sales in over 50 countries

Diversification by activity

Summary 2022 (I)

The Elecnor Group performed positively in 2022 in a context characterised by the widespread economic slowdown caused by several factors, such as: the impact of the Russia-Ukraine war; the energy crisis; supply chain problems; the sharp rise in inflation, which is particularly affecting the prices of raw materials, energy and fuel. A situation that central banks are endeavouring to check by raising interest rates, something we have not seen in decades.

Indeed, the Elecnor Group posted sales of EUR 3,613.7 million for 2022 (as opposed to the EUR 3,122.4 million last year), a 15.7% increase with respect to 2021. Both the domestic market (which represents 41% of the total) and the international market (which makes up 59%) experienced significant growth (4.8% and 24.9% respectively). This rise in the Group's figures for the year was made possible thanks to, on the one hand, Sustainable Projects activity in Elecnor's business in Australia, Brazil, Chile, the Dominican Republic, Mozambique, Cameroon, and Angola in particular and, on the other hand, to the rise in the Essential Services activity conducted by the Group in the United States and in European countries, chiefly Spain and Italy. Enerfin increased its sales by 32% thanks to higher energy prices in Spain, as well as the rise in

value of the Brazilian real and the Canadian dollar, the currencies in which its wind farms operate in Brazil and Canada.

EBITDA reached EUR 302.1 million, a rise of 11.1% on last year on account of how well all Group businesses performed.

The Elecnor Group attained net profits of EUR 102.8 million in 2022, which is a 19.7% increase on the profits obtained in the previous financial year (EUR 85.9 million).

The Group continuously evaluates its operating expenses to reduce any discretionary expenses, applying policies of contention and control to the expenses on a recurring basis, in all companies of the Group.

Elecnor (I)

This business, which the Group develops via its subsidiary Elecnor Servicios y Proyectos, S.AU. and that company's affiliates, has grown sharply in the period.

In the domestic market, activity continued to grow on the back of the essential services developed for the energy, telecommunications, water, gas and transportation sectors, where it works for all utilities. In addition, during this period, the construction work and development of wind and solar PV farms, as well as the restoration and maintenance projects related to self-consumption and energy efficiency, contributed to growth of both the turnover and the profit/loss of the Group.

In the international market, the enhanced performance can mainly be put down to the sustainable projects that the Group undertakes in Australia, Brazil and Chile (especially renewable energies and

the electricity transmission lines), in addition to the performance of the US subsidiaries (Hawkeye and Belco). The construction of wind farms in Colombia, solar PV farms in the Dominican Republic, Colombia and Ghana, hydroelectric plants in Cameroon and Angola and substations in the Democratic Republic of the Congo, among many others, also contributed to the Group's profit/loss.

The positive business performance in both markets is also seen in the increase in EBITDA compared to the same period of the previous year, although not in proportion to sales. This is caused by the fact that some of the aforementioned major projects are at the initial stages, which means that the main risks inherent to these contracts

were ongoing at the close of the financial year. In these stages, the Group cautiously estimates margins, thus these projects chiefly contribute to the growth of turnover, but are not yet translated into profit/loss growth.

The good performance of attributable consolidated net profit was buoyed by improved results achieved in the various vehicles that the Group uses to execute its projects abroad (permanent establishments and subsidiaries), enabling it to achieve a more favorable average consolidated tax rate than last year.

Elecnor (II)

The production portfolio, which can be executed in the next 12 months, amounts to EUR 2,408 million (EUR 2,291 million at the end of 2021). Of this portfolio figure, 74% relates to the international market, for an amount of EUR 1,774 million, and 26% to the domestic market, for an amount of EUR 633 million. The domestic portfolio mainly comprises contracts for essential services. The international portfolio is increasing in both European countries (Italy and the

United Kingdom), where essential service-related activities are carried out, and in other countries (Australia, the United States, Brazil, Mexico and Panama, mainly) where major projects for the construction of sustainable renewable-energy power generation plants and power transmission projects have been contracted.

Phase: **Initial**

Delivery: **2024**

Enerfín (I)

Enerfín participates in 1,552 MW of renewable energy in operation and under construction in Spain, Brazil, Canada and Colombia and it continues with its intense development activity to ensure growth and increase its pipeline, which currently amounts to nearly 9 GW of wind energy and photovoltaic projects. It is likewise continuing with the diversification of its activities through storage, hybridisation and hydrogen projects.

The positive evolution of Enerfín's profit/loss was mainly due to a more favorable price compared to the same period of the previous year for wind farms in Spain. Enerfín energy production for the year amounted to 2,879 GWh. Additionally, it is worth highlighting the positive performance of the Brazilian real and the Canadian dollar against the euro, currencies in which the Group mainly operates abroad.

In October 2022, Enerfín began the construction of a solar PV farm called Portón del Sol in Colombia. The farm stretches over approximately 216 Ha. and has a generation capacity of 129 MWp. Construction is expected to take about a year and a half. Moreover, the a solar PV project in Brazil, Solar Serrita, with an area of approximately 313 Ha. and a generation power of 68 MWp has also entered the ready-to-build stage. Construction is expected to take about a year.

In the domestic market, the Group maintains a strategy of contracting price hedge derivatives for part of its production. In that regard, according to its forecasts on changes in electricity prices, it uses derivative financial instruments to cover the risks of changes in such electricity prices. Within the framework of these operations, Enerfín enters into swap contracts to ensure a fixed energy price for a specific number of Megawatt-hours (MWh), which are settled on a monthly basis. These financial derivatives meet the requirements to be deemed hedge accounting in the consolidated Group. Similarly, the Cofrentes wind farm has entered into a long-term energy sales contract.

Celeo

Celeo, a company owned and managed jointly with APG, one of the world's largest pension funds, participates in 6,891 km of electricity transmission lines in Chile and Brazil, and in the operation and construction of 345 MW of renewable energy (photovoltaic and solar thermal) in Spain and Brazil. It is worth highlighting the start of work on the first concession in Peru (Puerto Maldonado). Overall, it manages around EUR 5,854 million assets in operation at the close of the year.

It is worth highlighting –in Celeo's Transmission Networks business– the entry into operation at the end of 2021 of the concession in Serra de Ibiapaba in Brazil and the positive performance of the US dollar and the Brazilian real against the euro, currencies in which the Group mainly operates in Chile and Brazil, respectively. Increased interest rates on financing transmission projects in Brazil had a significant impact on the profit/loss of this subgroup this year. This impact was offset in the year by revising the sale prices of these projects in accordance with the corresponding inflation rates, as well as by the effect of applying IFRIC 12 to income from the transmission projects in Brazil.

Furthermore, Celeo was awarded a new line in Coquimbo region in Chile this year, between the Don Goyo and La Ruca substations. This is a 220 kV double-circuit transmission line with an estimated investment of US\$95 million.

The solar thermal plants managed by Celeo in Spain have seen lower production due to restrictions on energy discharged to the grid, which

has had a negative impact of approximately EUR 5 million on Elecnor Group's income statement. As was the case with Enerfín, Celeo was affected by the regulation published in the reporting year to mitigate the impact of high energy prices mentioned above in the Enerfín section.

Moreover, Celeo reviewed the tax credits it had recognised in the companies that manage the solar thermal projects, proceeding to partially impair these by recognising a loss of EUR 14 million (approximately EUR 7 million of which correspond to the Elecnor Group).

Celeo is consolidated in the accounts of the Group using the equity method. For this reason, it does not contribute any turnover to the Group. During the year, it contributed an attributable consolidated net profit of EUR 17,153 thousand (EUR 14,998 thousand in the same period last year). As a result of the consolidation method used, this profit coincides with the profit before tax and EBITDA contributed to the Group by this business.

Grupo Elecnor: Income Statement

The Elecnor Group's sales reached EUR 3,613.7 million (EUR 3,122.4 million in the previous financial year), a 15.7% increase with respect to 2021.

Both the domestic market (which represents 41% of the total) and the international market (which makes up 59%) experienced significant growth (4.8% and 24.9% respectively). This rise in the Group's figures for the year was made possible thanks to, on the one hand, Sustainable Projects activity in Elecnor's business in Australia, Brazil, Chile, the Dominican Republic, Mozambique, Cameroon and Angola in particular and, on the other hand, to the rise in the Essential Services activity conducted by the Group in the United States and in European countries, chiefly Spain and Italy. Enerfín increased its sales by 32% thanks to higher energy prices in Spain, as well as the revaluation of the Brazilian real and the Canadian dollar, the currencies in which its wind farms operate in Brazil and Canada.

EBITDA reached EUR 302.1 million, a rise of 11.1% on last year on account of how well all Group businesses performed.

The Group's EBIT amounted to EUR 212.7 million as opposed to the EUR 178.7 for the previous year, which represents an increase of 19.1%.

The Elecnor Group attained net profits of EUR 102.8 million in 2022, which is a 19.7% increase on the profits obtained in the previous financial year (EUR 85.9 million).

Elecnor Group: Consolidated Balance Sheet and Debt Position (I)

On the asset side, the rise in non-current assets is particularly noteworthy, especially the increase in the carrying amount integrated by the equity method and the value of assets (specifically in wind farm investments) held in currencies other than the euro.

Group net equity rose by 31.5%, reaching the sum of EUR 833.3 million, which can be put down to the results in the first six months of the year, as well as the favourable negative differences in currency exchanges.

On the liabilities side, the main increases were caused by the effect the appreciation of the Brazilian real, the Canadian and American dollars had on debts held in those currencies. In addition, a new debt amounting to EUR 52 million was drawn down to build new wind farms in Ribera de Navarra.

Elecnor Group: Consolidated Balance Sheet and Debt Position (II)

Total net financial debt (EUR 546.9 million) increased by 5.8% with respect to the previous year (EUR 516.8 million).

Net financial debt with recourse (EUR 120.8 million) remained in line with last year's figure (EUR 119.4 million). This was mainly due to the positive cash generation performance of the Group's businesses as a result of its operating activities, which managed to offset the investment effort made by the Group in 2022. Moreover, the Group managed to finance consolidated turnover growth (15.7% and 27.1% in 2022 and 2021, respectively) and pay a dividend to shareholders (EUR 31 million and EUR 29 million in 2022 and 2021, respectively), thus continuing to improve the net financial debt-EBITDA ratio of recent years.

Although the Group analyses and monitors the evolution of Total Net Financial Debt, it pays special attention to Net Financial Debt with recourse, given that the remaining Debt is secured by the investment projects to which this financing is dedicated.

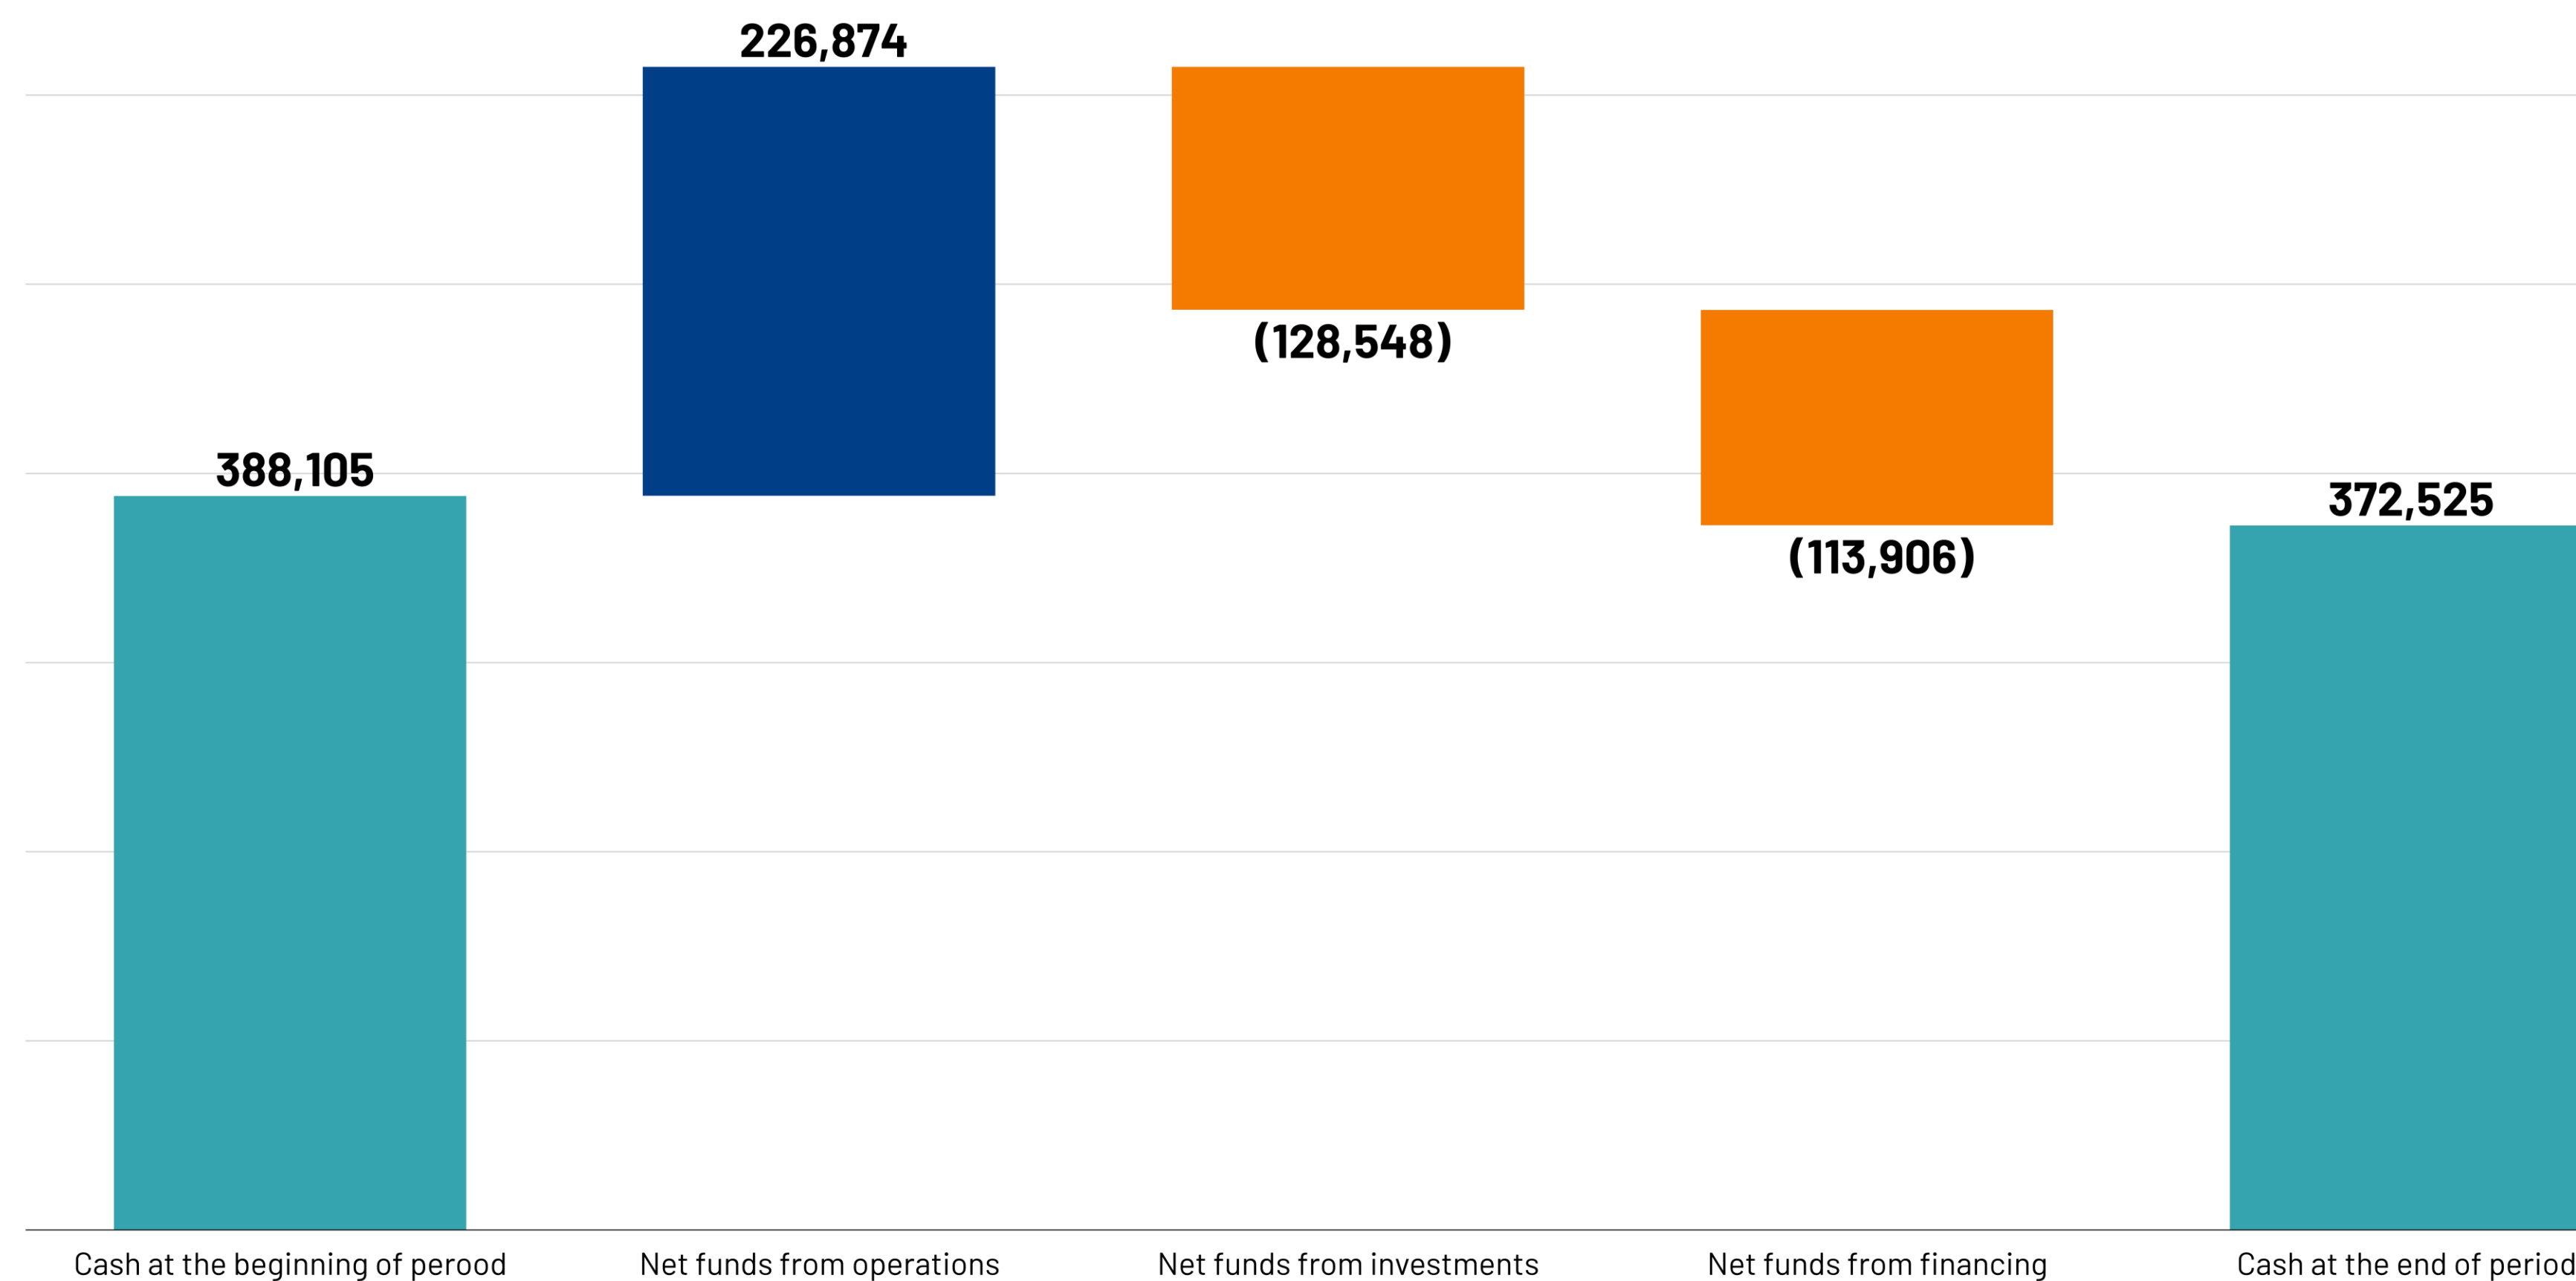

Elecnor Group: Statement of Cash Flow

In 2022, the Group's operating activity enabled it to generate a cash flow of EUR 226.9 million (EUR 206.2 million the prior year) and its net investment amounted to EUR 128.5 million (EUR 100 million the prior year).

The cash flows from operating activities in 2022 relate to the Group's routine operations, which were up by 10% with respect to the previous year.

Net cash flows from investment activities in the year are mainly from new investments in new property, plant and equipment, particularly in wind and solar PV farms.

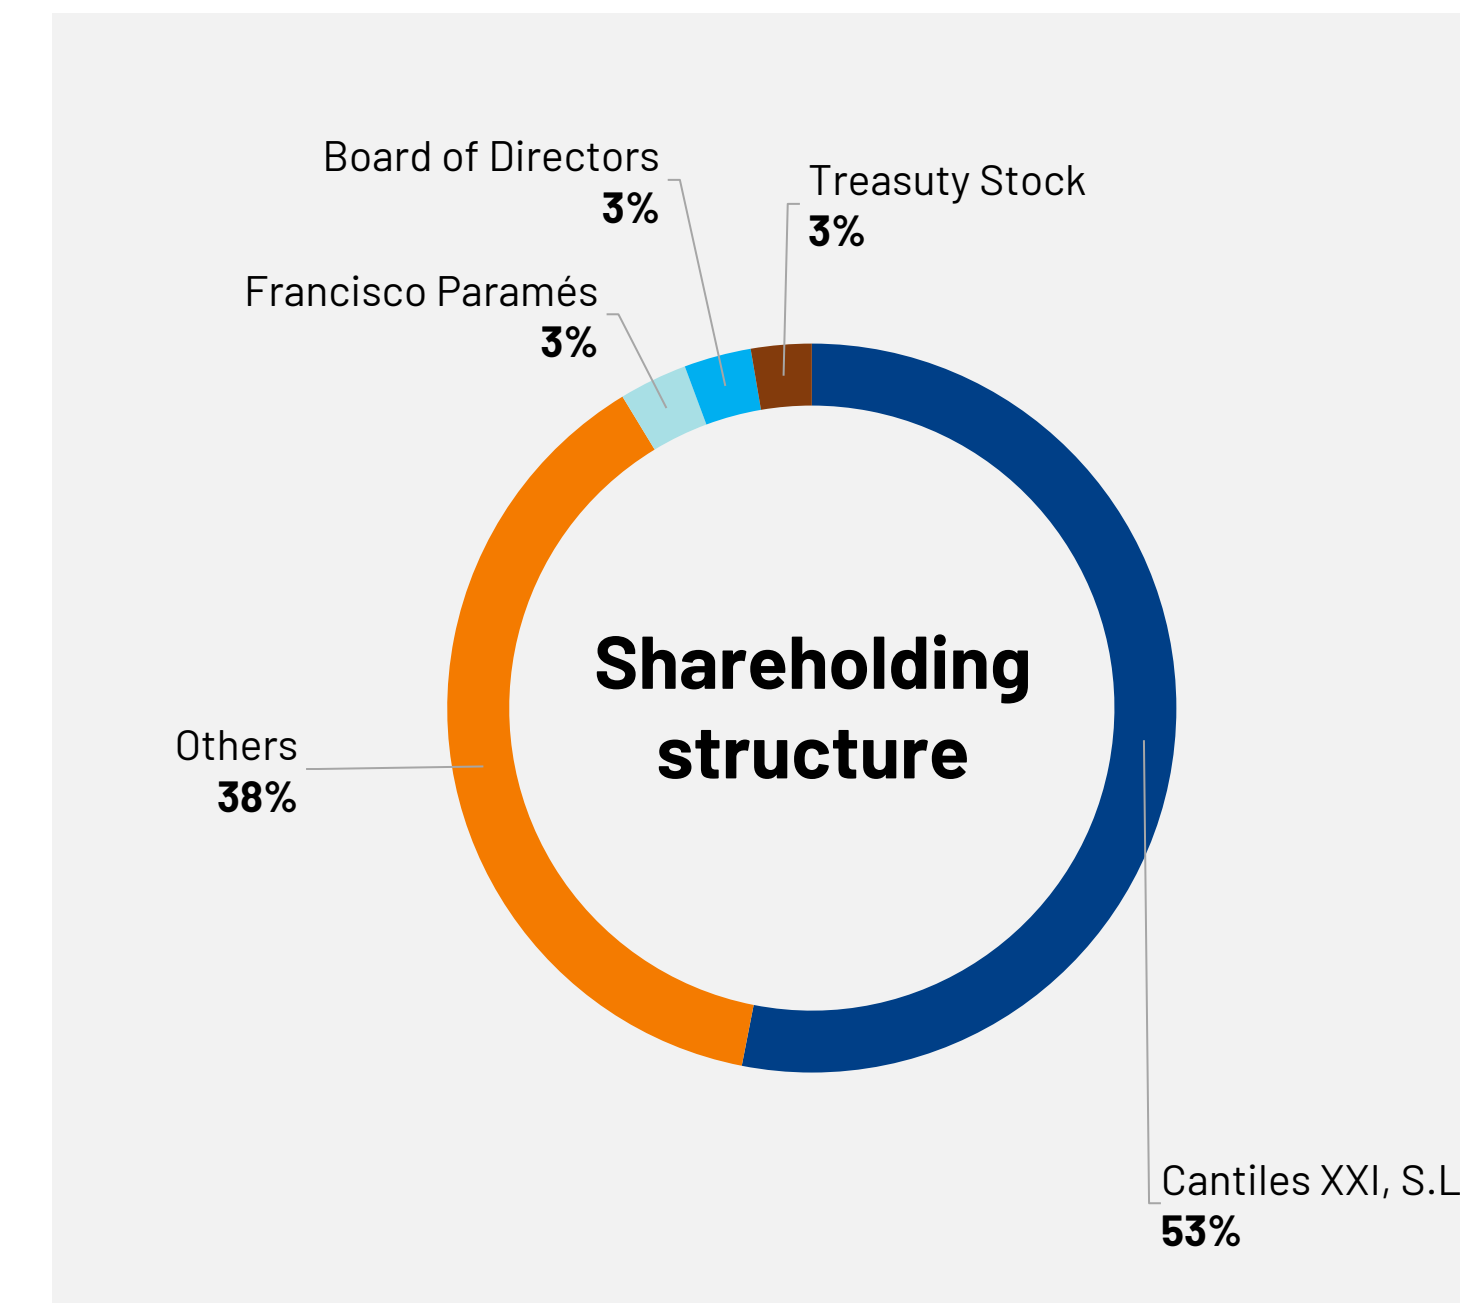

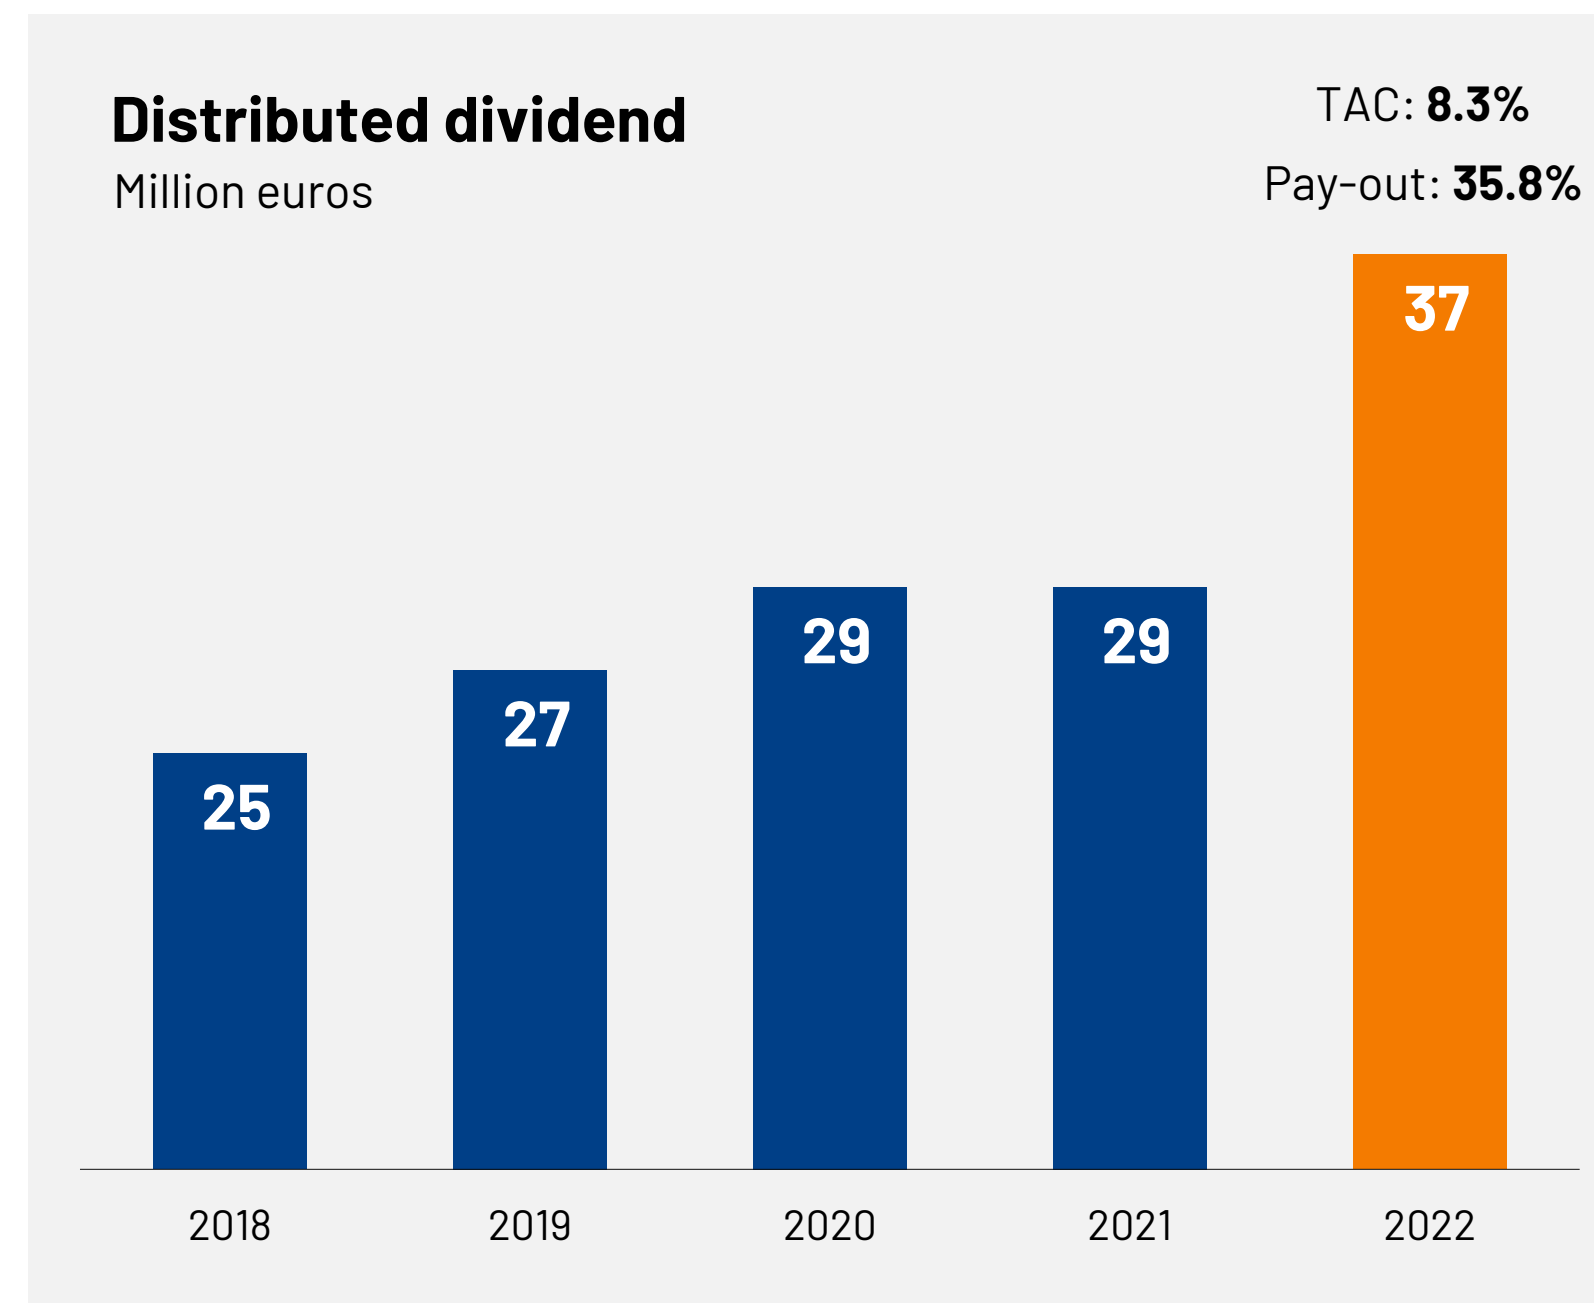

Dividends, Shareholding Structure and Treasury Stock

At 31 December 2022, the share capital of Elecnor, S.A. was represented by 87,000,000 shares, each with a par value of EUR 0.10 Euro, fully subscribed and paid in, implying a share capital of EUR 8,700,000.

Elecnor, S.A.'s shares are traded in Spain's SIBE electronic trading system, where shares in the leading Spanish companies are traded, and the market with the largest trading volume in Spain.

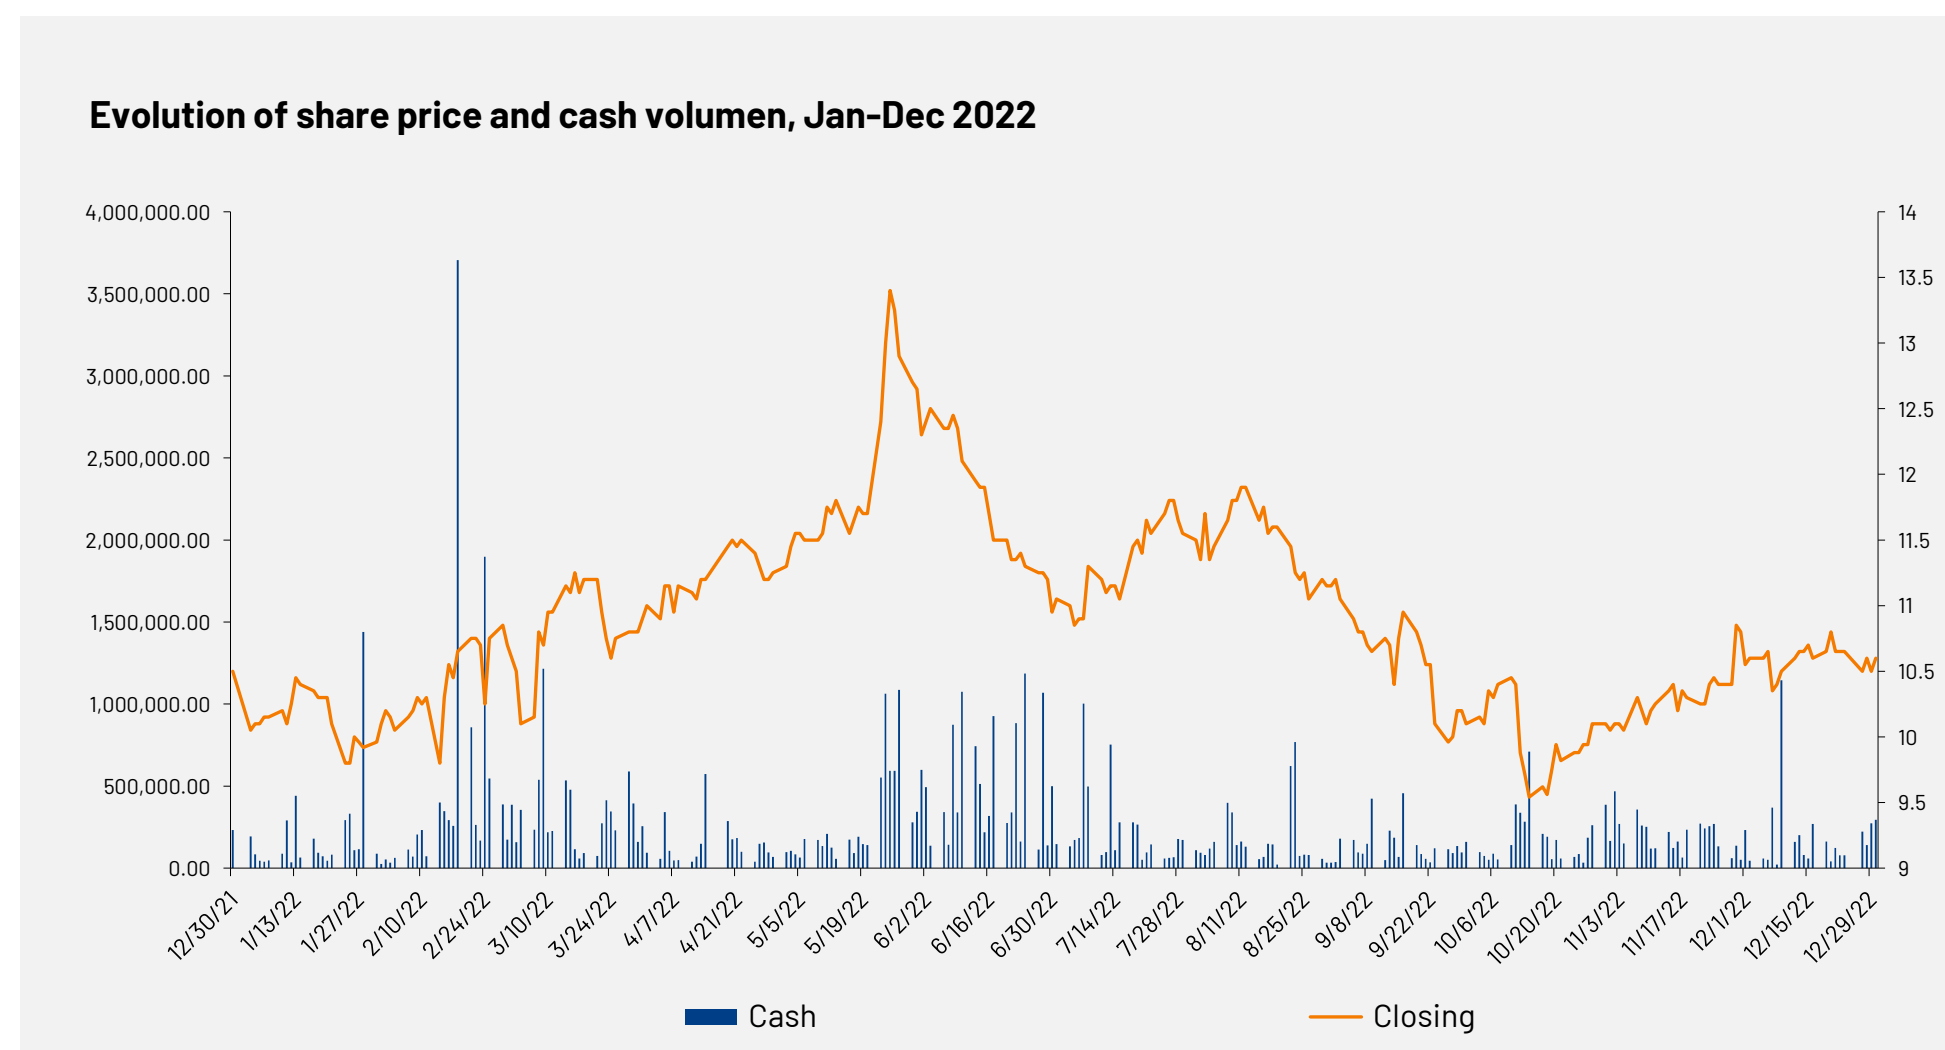

At 31 December 2021, Elecnor, S.A. had a portfolio of 2,320,749 shares. In 2022 it acquired 227,935 securities, and sold 226,300. Accordingly, at 31 December 2022 it had a total of 2,322,384 own shares, 2.7% of all shares in the company, unchanged on the previous year.

Elecnor Group in the Stock Market

Elecnor shares performed satisfactorily in 2022, rising by 1% in value thereby approaching a market capitalisation figure at the end of the year to the figure of EUR 1,000 million. Quite a strong performance bearing in mind the fact that reference market indicators, such as Ibex 35 and Ibex Small Cap fell by 5.6% and 12.8%, respectively. It should also be pointed out that the global economy and particularly securities markets operated against a rather complex background last year owing to the Russia-Ukraine war and a sharp rise in inflation that the banks have tried to curtail by implementing more restrictive monetary policies, raising interest rates in different markets, something not seen for many years now: the foregoing in a climate characterised by a slowing down of economic activity.

Nevertheless, in the particular case of Elecnor, the market positively received the different quarterly reports and relevant facts, accompanied by heightened engagement with investors by strengthening its presence in several fora and streaming quarterly results' webcasts. Furthermore, the company received greater coverage from analysts through non-sponsored research publications, the objective prices of which range mostly from €14.50 to €20, clearly attesting to the potential the market assigns to its quoted price. Also worthy of special mention is the improvement in liquidity levels with respect to 2021, both in the average daily of shares traded, as well as in terms of cash.

Ibex Small Cap	(12.8%)	1.8%

% of variation of closing price in the period from 12-30-2021 to 12-30-2022

ASG Commitment

Protecting the environment

- 2035 Climate Change Strategy in line with recommendations by the TCFD (Task Force on Climate-related Financial Disclosures).
- Validation of the emission reduction objectives from SBTi until 2035 (reduction in scopes 1 and 2 of 38% and 18% for scope 3).
- Top score in the international CDP classification, demonstrating The Elecnor Group's position in terms of adaptation and mitigation in the fight against climate change.
- Climate risks and opportunities analysis.
- Aenor Environment CO2 certificate verified according to ISO 14064-1:2018.
- Boosting renewable energy and energy efficiency with wind and photovoltaic energy hybridization projects as well as generation, storage and supply of green hydrogen.
- 1.897 MW of renewable energy under management and construction, 12% more compared to last year.
- Management of biodiversity and protection of the natural environment.

Focused on people

- Achivement of the best accident rate in the company's history.
- Health and safety in the workplace.
- Membership of the CEO Alliance for Diversity, focused on researching, developing and promoting strategies and good business practices for diversity, equity and inclusion.
- Operational excellence: increased customer satisfaction.
- 4% increase in labor force.
- 12% increase in the number of women.
- 31% increase in the number of women on Structure jobs.

 We invest in and develop infrastructures in order for society to progress

Good governance

- Compliance System.
- New Relations Policy with local communities.
- Elecnor, S.A.'s new Director Remuneration Policy for the years 2022-2025.
- Board of Directors restructuring: reduction of the number of directors and appointment of another woman as Director of Elecnor, S.A. as independent Director.
- Supply chain aligned with the Group's sustainability standards.
- Certification of the Social Responsibility Management System according to IQNet SR10.
- UNE-ISO 37001 anti-bribery management systems.
- UNE 19601 criminal compliance management systems.
