

## Elecnor is constructing a gas pipeline in Oman for EUR 72.5 million

- ▶ The group is building a 210-km pipeline to transport gas in order to meet increased demand in natural gas over the next decade.
- ▶ This is the fourth project that Elecnor has carried out in the country.

Elecnor is constructing a **210-km gas pipeline in Oman for EUR 72.5 million for OQ**, an international global energy company with its roots in Oman. The contract represents the group's grand entrance into the energy transportation sector in a country that is one of the main producers of natural gas in the world, which is looking to expand its gas transportation network in the southern region of the country in order to meet the expected increase in demand during the period 2022 to 2030. The project is being carried out in the area surrounding the town of Salalah, 150 km from the border with Yemen.

As well as the gas pipeline construction, work will be carried out on the connections to the existing parallel pipelines, as well as work related to teleprocessing and detection of leaks. The design of this strategic infrastructure will mean that the gas pipeline can automatically function without interruption, under constant supervision by the OQ control centre.

The works for this project will be carried out in a consortium with GPS, a local company, and will directly involve **850 employees**. The company estimates that the work will be finished mid-2023.

The construction of this gas pipeline in Oman will consolidate the course that Elecnor has been taking in the sultanate since 2015, when it entered the market with the Qurayyat Tie-in EPC project for water transmission. Later on, in 2016, the construction of a photovoltaic solar power plant was awarded, the 9 MW plant called PSP Mina Al Fahal.

In this country in 2020, Elecnor was awarded one of the greatest developments for conveying and supplying water that Oman has implemented to date, valued at EUR 192 million.

## Sustainability

**The Elecnor Group generates change and well-being.** For this reason, it is conscious of the importance of its activities on people and on the environment of the areas in which it operates. Its objective is to maximise the positive impacts it has on society and the environment and minimise the negative ones, by means of responsible, ethical and transparent behaviour. This commitment is inherent in the entire development of the Group's activities and its business strategy, as well as in its relationship with stakeholders.

## Our contribution to SDGs

### About Elecnor Group

Elecnor is one of Spain's leading business groups in the infrastructure, renewable energy, services and new technologies industries. With over 60 years of continuous growth and a presence in 55 countries, Elecnor Group focuses its activity on different industries, from electricity, gas, industrial plants, railways, telecommunications, water, control systems, construction, the environment and installation maintenance to aerospace engineering. Its strong international outlook has led the Group to a continuous expansion process which has opened the doors to new markets around the world, especially in Europe, North America, Central America, South America, Africa, Australia and the Middle East. Elecnor Group, which is listed on the Continuous Market, has a highly qualified team of professionals and a total workforce of 18,203 employees. In 2020, the company reported revenues of 2,456 million euros and a consolidated net profit of 78.3 million euros.
