The Elecnor Group lands in the aircraft maintenance sector with the 100% acquisition of JAS

- Jet Aircraft Services (JAS) is a benchmark in green recycling and sustainable management of the life cycle of aircraft.

The Elecnor Group is continuing to pursue its strategy of diversification and growth with the 100% purchase of Jet Aircraft Services (JAS), a leading Spanish company in comprehensive aircraft maintenance services.

With this operation, Elecnor has incorporated a new activity with a high added value and has boosted its standing in specialist industrial sectors with a considerable potential for growth.

Jet Aircraft Services (JAS) is a major company in the Spanish aviation sector, specialising in the aircraft's whole life cycle. Its business model encompasses everything from online maintenance to keep aircraft flying to the conservation of grounded aircraft and final recycling (dismantling) at the end of their useful life.

With over 25 years of experience, JAS has an operational presence in the main commercial airports in Spain: Adolfo Suárez Madrid-Barajas, Barcelona, Sevilla, Vitoria, Málaga and Zaragoza. It also operates in Morocco and the Dominican Republic. With bases in these locations, JAS offers a wide range of specialist services.

Sustainable management of the aircraft life cycle

JAS is one of the few companies in Spain with the certification and industrial capacity for green recycling of aircraft, in accordance with AFRA regulations. It is a benchmark in aviation 'urban mining', by managing the end of the operational life of aircraft in a sustainable way; it dismantles valuable components for recertification and sale on the second-hand market, and separates and recycles fuselage materials such as aluminium, titanium and copper, thereby minimising the environmental impact.

About the Elecnor Group

The Elecnor Group is a Spanish enterprise doing business in over 40 countries with activities based on three main strategic business lines: Services, Projects and Concessions and Propriety Projects. Its strong international outlook has led it to a continuous expansion process which has opened the doors to new markets around the world, especially in Europe, North America, Central America, South America, Africa, Australia and the Middle East. Elecnor, which is listed on the Continuous Market, has a highly qualified team of professionals and a total workforce of 24,655 employees at the end of 2024.
