Elecnor Servicios y Proyectos honoured at the Asepeyo Antoni Serra Santamans Awards for its commitment to occupational health and safety

Elecnor Servicios y Proyectos has received recognition for its **track record in prevention** at the **12th edition of the Asepeyo Antoni Serra Santamans Awards for best preventive practices**, organised by the mutual insurance company with the aim of recognising those member companies that have stood out for their results in the field of occupational risk prevention.

Elecnor Servicios y Proyectos is part of the Elecnor Group, a Spanish corporation with a presence in over 40 countries, established as an international leader in the integration of renewable energy concessions, sustainable infrastructure projects and essential services for the energy transition and the digitalisation of cities.

Enrique Rodero, manager of Elecnor's Joint Prevention Service, received the award from Fernando Casado, president of Asepeyo, at the awards ceremony held at the Acciona Campus in Madrid.

Elecnor Servicios y Proyectos has earned this recognition for having participated in several editions of the Asepeyo Antoni Serra Santamans Awards for best preventive practices. In the fourth edition, it was honoured for its project 'Awareness campaigns for behavioural change' in the 'Prevention Management' category. In this edition, it presented the initiative 'Transforming with purpose: BIG DATA, AI and people joining forces to make Elecnor the safest workplace day by day'.

The project consists of a transformation plan that has enabled the transition from a risk prevention record-keeping system based entirely on paper documentation to a paperless system. All processes, documentation, signatures, etc. have been digitised and are archived electronically. In addition to the environmental benefits, the new system has enabled the automation of many processes, reducing administrative tasks and freeing up time for employees at all levels of the company.

A sustainable value. ESG commitment

Sustainability at the Elecnor Group is centred on its purpose: **to be a global provider of infrastructure, energy and services, driving development and opportunities for people around the world**. This commitment to sustainability is inherent in all its activities and business strategy, as well as in its relationships with its stakeholders.

The Elecnor Group's Strategic Sustainability Plan focuses on creating value and generating economic, environmental, social and governance dividends. In this regard, it highlights its commitment to operational excellence; occupational health and safety as fundamental pillars in the conduct of its activities, with an emphasis on accident prevention; environmental management to achieve a low-carbon society through renewable energy and the reduction of GHG emissions; along with the protection of biodiversity and the natural environment in all projects.

All of this is carried out under responsible management, underpinned by the highest ethical standards, and endorsed by multiple certified systems.

Press release
