Elecnor Sistemas and the Port Authority of A Coruña to host pioneering forum on interoperability, cybersecurity, artificial intelligence and data management on 1 October

- The event will take place at the MEGA Museum and will combine presentations, panel discussions and practical demonstrations focused on port innovation

Elecnor Sistemas and the Port Authority of A Coruña will host, on **Thursday 1 October**, the **first edition of Interport Summit 2026**, a one-day event conceived as a meeting point for Spain's Port Authorities and Puertos del Estado (the Spanish State Ports agency), with the aim of sharing experiences, analysing trends and addressing some of the main technological challenges facing the port system.

The event will bring together in A Coruña managers and professionals from the technology, innovation, infrastructure and operations departments of the Port Authorities to explore strategic issues such as **systems interoperability, cybersecurity, artificial intelligence applied to port management, and advanced data integration and exploitation**.

Under the theme of **technological transformation and port connectivity**, Interport Summit 2026 offers an opportunity to exchange knowledge, learn about real-world experiences from different organisations and explore innovative solutions aimed at improving the efficiency, security and competitiveness of port infrastructure.

The programme will include several specialist presentations focusing on technological interoperability in port environments, integration between management and control systems, integrated physical security, the application of artificial intelligence to operational efficiency and the protection of critical infrastructure against cybersecurity threats. There will also be a **live proof of concept** showcasing a range of use cases relating to interoperability in the connected port.

The event will also feature **two panel discussions** in which representatives of various Port Authorities will present case studies and share their views on technology standards, data ecosystems and the opportunities that digitalisation offers to generate added value in the port sector. Speakers will include senior figures from the ports of **A Coruña, Pasaia, Bilbao, Vigo, Huelva and Barcelona**, as well as representatives of **Puertos del Estado and Navantia**.

Press release

Madrid, 28 September 2026

In addition to the technical and professional appeal of the programme, Interport Summit 2026 will run from **9am to 4pm** at a truly distinctive venue: the **MEGA Museum (Mundo Estrella Galicia)**. Conceived as an immersive and interactive experience, MEGA incorporates digital resources, personalised content and a variety of technological tools that allow visitors to interact with the tour and explore the information in greater depth according to their interests, making it a setting particularly well suited to the themes of innovation and digital transformation at the heart of the event.

With this initiative, Elecnor Sistemas and the Port Authority of A Coruña reaffirm their commitment to innovation, digitalisation and collaboration between port bodies, fostering forums for dialogue that drive progress towards increasingly smart, connected ports that are ready to meet the challenges of the future.

About Elecnor Group

Elecnor Group is a Spanish corporation present in more than 40 countries, whose activities are structured into three business segments: Services, Projects, and Concessions and Own Projects. Its strong international focus has led the company through a continuous process of expansion that has opened the door to new markets worldwide, the main ones being Europe, North America, Central America, South America, Africa, Australia and the Middle East. Elecnor, which is listed on the Spanish Continuous Market, has a team of highly qualified professionals and a workforce of more than 29,000 employees as at the end of the first half of 2026.
